Internet Technology Personal Individual Task (HTML & CSS)

Build a multi-page Personal Course Organizer website using HTML and apply professional styling and responsive layout using CSS. The pages should be deployed on GitHub pages.

Requirements:

- 4 pages: Home, My Courses, Add Course, Contact Us.
- Semantic layout (header, nav, main, section, footer).
- Navigation menu linking all pages.
- Course table with minimum 5 sample entries.
- Complete form including Course Name, Instructor, Credit Hours, Notes.
- Clean indentation and organized folders.
- External CSS file only.
- Unified color theme.
- Styled navigation bar.
- Styled table and form.
- Responsive layout implementation.
- Hover effects and transitions.
- All 4 pages should be deployed on GitHub pages.

Due Date: Thursday April 16th, 2026 mid night.

Submission: Submit your online pages (browsable website pages) links on the following form. **Send GitHub Pages URLs.**
